My routine for the past week is very solid. Apart from being a student, I also work as an honorary employee on DISKOMINFO Mangarai Timur. My activities on weekdays are college and work. Every morning before going to work, I always prepare my food to take to the office. Sometimes while I do my work, I do my study paperwork assignment too. At the weekend I'm very happy because I can take a break from my various activities. Usually, on weekends I spent time with my family, hang out with friends, watch TV, and relax.

On Sundays, our family worship together at church, after we return home from worship, my mother takes care of her plants while I clean the house. Then in the afternoon, we were very busy with our respective activities, my father loved playing music, and my mother and I prepared for dinner. Sometime before going to sleep, I usually say hi by video call with my friends in Yogyakarta and tell them how things go around here. Finally, we prepare to sleep.
